SOHAN ENJAMURI

Full-Stack Developer & Software Engineering Student

Focus: Modern Web Apps • Git Version Control • Cloud Systems

Email: sunnyenjamuri4456@gmail.com
GitHub: github.com/sohanenjamuri
Portfolio: sohanenjamuri.github.io/portfolio
LinkedIn: linkedin.com/in/sohan-enjamuri
Location: India • Open to Internships

PROFESSIONAL SUMMARY

Detail-driven Computer Science undergraduate specializing in full-stack web engineering, modern JavaScript architecture, and version control workflows. Demonstrated proficiency in building responsive web applications with semantic HTML5, modern CSS3, and JavaScript/React. Hands-on experience with collaborative Git branching models, merge conflict resolution, CI/CD automation, and live deployment on GitHub Pages as part of Course IT4048 (Version Control with Git and GitHub).

TECHNICAL & SOFT SKILLS

Frontend:	HTML5, CSS3, JavaScript (ES6+), React.js, Responsive UI/UX, Flexbox, Grid
Backend & DB:	Node.js, Express.js, RESTful APIs, JSON, MongoDB, PostgreSQL, SQL Basics
Version Control & Tools:	Git (Branching, Merging, Rebasing, Stashing), GitHub, GitHub Pages, VS Code, Bash/CLI
Soft Skills:	Problem Solving, Team Collaboration, Agile Sprint Workflow, Documentation, Adaptability

FEATURED PROJECTS

DevPulse — Developer Activity & GitHub Analytics
2026 | Live Demo & GitHub

Tech Stack: JavaScript, GitHub REST API, Chart.js, HTML5/CSS3

- Architected a high-performance developer metrics dashboard that visualizes commit trends, code frequencies, and active pull requests.
- Integrated client-side caching to reduce GitHub REST API rate-limit usage by 40% while preserving sub-second load times.

CloudVault — Modern Secure Cloud Storage Platform
2026 | Live Demo & GitHub

Tech Stack: HTML5, CSS3 Glassmorphism, JavaScript (ES6+), LocalStorage API

- Implemented drag-and-drop file upload interface with visual progress bar, file-type filtering, and encryption badge indicators.
- Built dynamic category filtering (Documents, Images, Media) with responsive grid and list views.

AlgoArena — Interactive Algorithm & Sorting Visualizer
2025 – 2026 | Live Demo & GitHub

Tech Stack: JavaScript, HTML5 Canvas, Modern CSS Transitions

- Designed an intuitive visualizer for QuickSort, MergeSort, and Binary Search with customizable array sizes and playback speeds.
- Added real-time comparison counters and big-O notation complexity breakdowns for educational clarity.

Personal Portfolio Website (Mini Project IT4048)
2026 | GitHub Pages

Tech Stack: HTML5, CSS3, JavaScript, Git, GitHub Pages

- Built a responsive, multi-section personal portfolio satisfying all criteria for IT4048 Version Control with Git and GitHub.
- Features dark/light themes, interactive contact form with instant validation, animated skill bars, and live GitHub Pages hosting.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering
2023 – 2027

Coursework Highlights: IT4048 Version Control with Git & GitHub, Data Structures, Web Technologies, Database Systems

VERSION CONTROL (IT4048) & ACHIEVEMENTS

- **Git & GitHub Mastery:** Experienced in repository setup, branching workflows (feature branches, main), semantic commits, rebasing, pull requests, code reviews, and resolving merge conflicts.
- **Automated Deployment:** Configured GitHub Pages deployment for zero-downtime, continuous static hosting from the main branch.
- **Open-Source Engagement:** Regular contributor to student open-source repositories and collaborative coding projects.
